NSPI Announces expanded Unified Communications solutions that function with Microsoft Office Communications Server 2007 and Microsoft Office Communicator 2007.

[Roswell, GA] — Oct. 16, 2007 — NSPI, today announced that it has expanded its portfolio of advanced unified communications solutions providing customers with new productivity and integration with their current investments of Microsoft Exchange Server 2007, the 2007 Microsoft Office system and Microsoft Dynamics CRM.

“NSPI has provided customers with high-quality solutions to achieve their business objectives for over 21 years,” said Tim Roe, Director of Sales & Marketing, NSPI. “By working together with Microsoft, we are excited to offer new voice capabilities with Microsoft Office Communications Server 2007 and Microsoft Office Communicator 2007.”

“These new voice applications bridge the gap that exists between productivity tools employees use every day. In addition to bringing these technologies together, unified communications allows those technologies to be delivered across networks to employees wherever they’re working and to whatever device they’re using.”

“Microsoft is pleased to be working with NSPI to deliver a streamlined communications experience to customers,” said Meg Slesinger, partner account manager, Unified Communications Group, at Microsoft Corp. “Office Communications Server bridges the gap that exists between productivity tools employees use every day. In addition to bringing together these technologies, Microsoft unified communications solutions help employees communicate anywhere and on any device.”

For over 21 years NSPI has been focused on the implementation and support of technology solutions that enable our customers to accelerate growth, productivity and profitability. While there have been significant changes in the underlying technologies we have deployed, two constants have remained... Quality Workmanship and Ethical Business Practices. These two critical constants guide our team to ensure solutions are delivered with quality and our recommendations are in alignment with the best interests of our customers.

Delivering technology solutions requires deep professional expertise and experience. Our teams pride themselves on having both attributes at their disposal when engineering and supporting customer solutions. When you combine over 21 years in the industry plus hundreds of hours in training & updated certifications every year - our service professionals are recognized as best-in-class by our customers and vendor relationships.
