

Recycling and Disposal

Disposal of electronic equipment, such as old computers, monitors and printers, is becoming a bigger problem every day. NSPI can help you manage the end-of-life processes of your assets, whether you're looking to resell, redeploy, dispose or recycle.

NSPI can help you redeploy or dispose of your equipment

Imagine that your company is about to embark on a large desktop refresh project. As you work through the details of procuring the equipment and scheduling the deployment, you start to think about what you're going to do with all the existing equipment. Can some of the equipment be redeployed? Can it be sold? How and where will you dispose of the non-usable equipment? Are there federal, state and local laws concerning the disposal of electrical equipment? What can be recycled? How can you ensure that sensitive data is completely erased and destroyed?

NSPI's Disposal and Recycling Services

These and other questions demonstrate that equipment disposal is not something that can be done as an after-thought anymore. As part of our lifecycle services, NSPI can manage all aspects of retiring your old IT equipment so that you are free to focus on activities more essential to your business. Some of the activities we can assist you with include:

- ▶ Planning with you to determine the practices and policies for redeployment, reselling, data destruction, recycling and disposal
- ▶ Managing the schedule for the pickup and disposal of equipment
- ▶ Packing and picking up of all equipment
- ▶ Providing a physical audit of all items received
- ▶ Data erasure and overwriting of hard drives
- ▶ Physical destruction of data storage devices
- ▶ Inspection and preparation of equipment that is to be redeployed
- ▶ Delivery of assets that are being redeployed
- ▶ Providing EPA-compliant recycling services and the management and proper certified disposal of hazardous waste
- ▶ Thorough reporting on equipment collected, activities performed, etc.

Brokerage Solutions

NSPI also offers brokerage solutions for assets that still have market value. As with equipment to be disposed and recycled, NSPI will pick up

NSPI can help you plan, deploy, manage and refresh all of your IT equipment no matter what mix of computers, servers and devices you require.

all equipment at your locations. We perform a physical audit and do a market value assessment. Before any equipment is resold, our technicians will erase/overwrite the hard drives. The equipment will then be put up for bids and sold to the highest bidder. All residual value will be returned to you at 100%. To complete the transaction, a transfer of title will be provided.

Be Prepared for Your Next Change

Electronic equipment disposal can be a costly, time consuming activity for any company. The good news is that NSPI has the knowledge and experience to help. Contact your dedicated NSPI Account Executive to learn how we can provide a customized, cost-effective solution for your specific needs.
