

## eProcurement

NSPI has the skills, the experience and the tools to help you through the entire IT eProcurement life cycle, from forecasting and the management of orders and manufacturers, through inventory, integration and logistics, and finally to deployment and disposal.

# NSPI helps take the hassles out of IT procurement

NSPI has been procuring product on behalf of our customers for over 25 years. Our experienced professionals can assist you with procuring and utilizing IT equipment wherever you need it in the lifecycle.

We have over 3,400 companies represented in our product catalog with real-time, online connections to leading distributors and manufacturers such as Lenovo, IBM, HP Partner Direct, Ingram Micro, Synnex and Tech Data.

### Dedicated Specialists

To assist our customers with ordering, NSPI has a dedicated Inside Sales Team for order placement and management. We also have a team of full-time Product Specialists who work directly with manufacturers to take advantage of all special pricing and rebate programs in order to provide our customers with the best pricing possible.

### OpsTRACK

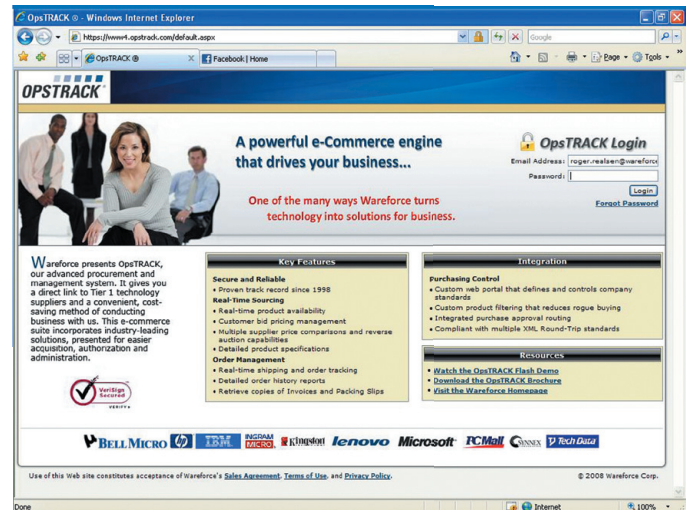

To further help our customers manage their IT product procurement, NSPI has developed OpsTRACK, our advanced technology procurement and management system. It offers our customers a direct link to tier-one technology suppliers, and it's a convenient, cost-saving method of conducting business with us.

OpsTRACK incorporates industry-leading solutions, presented simply, for ease of acquisition, authorization and administration.

### The system suite includes:

- Procurement Manager
- License Manager
- Asset Manager
- Workflow Manager (optional)

Our system can easily integrate to your ERP system or provide a seamless punch-out from other procurement systems, like Ariba or Oracle Exchange.

NSPI offers our OpsTRACK technology procurement and management system to all our clients for easy acquisition, authorization and administration.

### Other Capabilities

NSPI has a range of financing options for your product purchases, including both operating and capital leases. We also can provide custom financing for companies who need a unique payment plan.

NSPI has warehouses and integration centers in three locations across the U.S. where we can receive, configure, tag, store and ship your product orders. With our large field technician workforce, NSPI can also assist you with your deployments, break/fix and deskside support. And when your assets have reached the end of their lifecycle, we have the facilities to recycle and dispose of your equipment and ensure that your private data is properly erased and destroyed.
